Flipped Learning 101

Teachers everywhere are flipping their classrooms, and the results speak for themselves...

78% of teachers have flipped at least one class

96% of these teachers who’ve tried the flipped method would recommend it to others

In flipped classrooms, student engagement improves, and grades do, too...

9 out of 10 teachers saw student engagement increase after flipping their classroom

71% of teachers surveyed reported that students have earned higher grades since their classroom was flipped

Traditional Approach

Before Class

Students read at home

During Class

Students listen to teacher’s lecture

After Class

Students attempt homework

Flipped Approach

Students complete interactive study at home

Students apply concepts with feedback from teacher

Students check understanding and advance to more complex tasks
